SUMMARY

I am a Full Stack Software Engineer building web applications, AI-powered solutions, and QA automation tools using React.js, Node.js, Express.js, Python, and Azure. Experienced in leading junior developers, reviewing code, planning technical tasks, and collaborating on system architecture and infrastructure cost optimization. Strong background in REST APIs, databases, cloud deployment, and automation.

EDUCATION

National University of Science & Technology (NUST)
Bachelor of Engineering in Computer Engineering

September 2022 – MAY 2026
Islamabad, Pakistan

EXPERIENCE

Zapply

Full Stack Engineer

December 2025 – Present
Remote, US, Full-Time

- **Tech Stack:** React, Node.js, Express.js JavaScript, Docker, SupaBase, DOM, Communication API, Git
- Lead junior developers as **Technical Lead**, supporting task planning, code reviews, architecture decisions, and cost optimization.
- Enhance an internal QA automation platform to reduce repetitive manual testing and improve QA efficiency.
- Develop and optimize autofill features.
- Refactor platform code, resolve large scale merge conflicts, and prepare pull requests.

PsychiatrAI ★ [Certificate](#)

Full Stack Intern

June 2025 – August 2025
Remote, Pakistan

- **Tech Stack:** LangGraph (Backend), LangSmith, LangChain, LangSmith Python, Redis, Vercel, Render, React.js
- Developed a mental health chatbot leveraging Cognitive Behavioral Therapy principles to facilitate structured therapeutic sessions and provide AI-powered guidance.
- Engineered backend architecture for CBT conversation flows using LangGraph nodes and LangChain components with Prompt engineering and function-calling pipelines context-aware interactions.
- Deployed LangGraph on self-hosted platforms utilizing **LangGraph Server APIs** and integrated backend services with **React.js** frontends featuring responsive UIs.

CARE Pvt. Ltd. ★ [Certificate](#)

AI/ML Intern

June 2025 – July 2025
Islamabad, Hybrid

- Conducted comprehensive model research and selection for machine learning application in healthcare domain.
- Researched and evaluated fetal CLIP model architecture for medical imaging analysis.
- Documented research findings and model performance metrics for fetal CLIP model implementation.
- Compiled technical documentation detailing model selection criteria, evaluation results, and recommendations.

Fiverr

Desktop Development Engineer

January 2024 – June 2024
Freelance, Remote

- **Tech Stack:** Java, C++ (Qt Framework), MySQL, SQL Server
- Developed desktop applications using **Java and C++ (Qt Framework)** to build responsive and user-friendly interfaces.
- Designed and managed relational databases using **MySQL, SQL Server** for efficient data storage and retrieval.
- Delivered customized client solutions by integrating frontend interfaces with backend database systems.

PROJECTS

- Mission Logging and Tracking Web/Mobile App for Pakistan Army Pilots

• Tech Stack: Django REST Framework, PostgreSQL,Railway(deployment), flutter

• Developed a cross-platform mobile application for Pakistan Army pilots to streamline mission logging and tracking operations utilizing **client-server architecture**.

• Built Django REST backend with PostgreSQL database for efficient mission data storage and retrieval.

• Enabled real-time mission tracking with filtering capabilities by pilot, location, and date for unit commanders.

Azure Daycare Management System

• Tech Stack: React.js, TypeScript, Tailwind CSS, TanStack Query, Azure Functions

• Developed a cloud-based daycare management platform for **client registration, attendance tracking, staff management, invoice processing, incident reporting, and operational analytics**.

• Implemented secure **admin and worker role-based access** using JWT authentication, bcrypt password hashing, login rate limiting, and session invalidation.

CRM Agent – Marketing AI

• Tech Stack: LangGraph, Supabase, MCP, Gemini API, Python

• Built an AI-powered CRM agent using **LangGraph, RFM analysis, and human-in-the-loop workflows** to automate customer segmentation and marketing campaigns.

• Integrated **Supabase and Model Context Protocol (MCP)** for real-time customer data management and seamless tool connectivity.

Meeting Assistant with CrewAI Flow based Automation

• Tech Stack: CrewAI, Slack API, Trello Api ,Python

• Built a meeting assistant using CrewAI to extract action items and tasks from meeting transcripts.

• Integrated Slack API to automatically push extracted tasks and updates to team channels.

Mental Health Insights in the Tech Industry Using Interactive Data Visualization

• Tech Stack: Streamlit, Python, Flask

• Built an interactive dashboard using Streamlit for visualizing trends in burnout, support, and awareness.

• Applied data exploration and storytelling techniques to highlight key behavioral patterns.

Efficient Word Finder with File Ranking and Links

• Tech Stack: C++, Data Structures, Algorithms, QT Framework (GUI Development)

• Developed a word search engine with interactive user interface for efficient multi-file word searching and ranking.

• Implemented Ternary Search Tree data structure for optimized word lookups and file location extraction.

• Built file ranking system based on word occurrence frequency to prioritize most relevant results.
- SKILLS & EXPERIENCED WORKING WITH

- Languages & UI:** Python, Java, C++, JavaScript , HTML, CSS
Frameworks & Libraries : React, Node.js, Express.js, LangChain, TensorFlow, CrewAI
DataBases , Cloud & Deployments : MongoDB, Sql-Server, MySQL , Supabase , Redis, Vercel, Render, Docker, Azure
SEO & Website Optimization
Version Control & Collaboration: Experience in version control using GitHub for collaborative project development
- CERTIFICATIONS

- Introduction to Deep Learning & Neural Networks

Advanced Learning Algorithms by Andrew Ng

Coursera

Coursera
- RELEVANT COURSEWORK

- Cloud Computing

• Object Oriented Programming

• Data Structures & Databases
- ACHIEVEMENTS

- NUST High Aciever Award 2023
Institution Topper High School
- EXTRACURRICULAR ACTIVITIES & COMMUNITY SERVICE

- Seminar & Workshop Organizer:** Organized various seminars and workshops as part of curricular activities.
